

ANNUAL REPORT

2014

Mission & Objectives

MISSION STATEMENT

To help India's Muslims and minorities
achieve security, freedom and equality
- Their rights as citizens of India.

PROVIDING REAL SOLUTIONS TO REAL NEEDS FOR OVER 30 YEARS

Founded in 1981, IMRC began with a vision to assist minority communities of extreme poverty in India.

The donations we raise help fund hundreds of charitable projects throughout India. Even the smallest donation can greatly benefit the lives of the needy, orphans and widows. Donating through IMRC, you support a network of more than 100 organizations in India. These organizations provide educational and financial support, healthcare, emergency relief, and legal support/aid to thousands of needy across India.

OUR OBJECTIVES:

- Provide economic & educational assistance to orphan and destitute children
- Provide emergency relief & medical aid
- Disseminate information on the plight of marginalized communities in India.

From the Executive Director

Salam alaikum,

Each year I look back and reflect on IMRC spent its time with building ideas and which ones we could actually implement. Alhamdulillah, the IMRC Team has been able to accomplish many - each year reaching out to more and assisting more. IMRC began with the help of 50 children 33 years ago who were riot victims of Jamshedpur, India. This initiative has now grown from thousands into millions of beneficiaries. We focus on areas which can uplift communities out of poverty and into opportunity; such as education, clothing, feeding, healthcare, basic necessities such as access to potable water, shelter and relief due to emergencies and so much more. We never thought the small effort made back then would make such an impact today. It has led to building a university, a hospital and hundreds of schools. As we grew over time with your support, so did our projects and ideas for improvement; and Insh'Allah it continues to do so.

The recent challenges in India's new government worries me as it brings more challenges for our community ahead. We cannot meet these challenges unless we come together to identify them correctly, organize ourselves, and face them in unity. Let us meet at the Annual ISNA Convention.

There's a saying, 'Time is Money.' However, with IMRC, time is vital. Within 24 hours of the Kashmir Floods we had to respond and be on-site with relief kits and supplies. When a sick child stood in line with his mother for hours just to be seen at one of our free clinics, they needed treatment and medicine the same day. During Ramadan, time is constrained to 30 days, sunrise to sunset; we must provide millions of meals for those fasting across 11 states in India. It is through the time of hundreds of volunteers that has made our projects ongoing, reliable, beneficial and productive. I cannot thank them enough!

I encourage all of you this year to make the intention to volunteer an hour towards an IMRC project of your choice. Whether it's from forwarding a few emails, speaking with friends or hosting a small program; inshAllah it can be productive and beneficial. Together we can reach new heights. I look forward in connecting with you and hope to see you at an IMRC program soon.

Jazakh Allah khair

A handwritten signature in black ink, appearing to read 'M Ghori'.

Manzoor Ghori
Executive Director

EDUCATIONAL OPPORTUNITY

While India can claim the title to be first Asian nation to reach Mars, it hasn't translated into improved basic educational standards among its 1.2 billion people, particularly for children living in poor and marginalized communities. India's Muslim community has the lowest college enrollment of any religion-based group in the country.

To sustain and reinforce our impact, we're counting on you. With your support, we can invest in more projects that help children living in poverty overcome obstacles to education.

"When you ask the parents what they want for their children - even in flood zones and disaster areas - they seek the same thing: education. Parents want their children in a good school and know an education is the way to a better future." Manzoor Ghori visited Kashmir's flood affected areas. Oct 2014.

FOR QUALITY EDUCATION

WE MUST

Eliminate cost barriers to attend & complete school

Identify children not enrolled in school

Build more schools & facilities

IMRC PROVIDES

Hundreds of scholarships are awarded for deserving students. 90% of JIT's student rely on financial assistance.

We seek students from elementary to university level that are not in school and encourage them to enroll.

We build schools in slum/poor neighborhoods for accessible education

11 OUT OF EVERY 100
MUSLIM STUDENTS IN INDIA ENROLL IN
HIGHER EDUCATION

14% of India's vast population
are Muslim

YET

- Rank lowest in literacy
- More live in slums than any other group

TOGETHER WE ARE MAKING A DIFFERENCE

Supported Challenger Int'l School

Challenger is a great example of assessing the needs of a community and providing a solution. This school offers a chance for orphan children to enroll with other students and collaborate for the purpose of learning with high standards. This school of now 551 began in 2011 with only 80 students! The orphans enrolled at this school are also taken into further care. A separate housing facility was made for them to eliminate the feeling of loneliness and desertion. They receive nutritious balanced meals, enrichment activities, have a school bus to take them to and from school, can celebrate Islamic holidays and have after-school religious studies. Thank you for helping these children thrive!

Challenger Girls Jr. College - In Progress

A hurdle for many girls is to continue studies beyond elementary education. Many cannot afford college, thus, remain unskilled and begin a labor related job or stay home to assist their family. IMRC began this new junior college specifically for girls to encourage them onto higher education and create a college prep program which would provide training and leadership skills to prepare them for a career. A special 2-year program at this college will provide the skills needed to transition to a skilled profession upon completion and/or go further into university. Jazakh Allah for your help.

When a girl receives an education, she has a real opportunity to break the cycle of poverty in just one generation.

\$3000

Give her a home

Build a safe & secure place for a girl to live on campus.

\$1000

Support her

Support a girls tuition, room & board for one year at Challenger Girls Jr College or JIT.

\$500

Sponsorship

Sponsor a girl's tuition for a year at either institution.

When a girl goes to school

She will reinvest **90%**
of her income into her family*

*clintonglobalinitiative.org

College of Education coming to JIT!

JIT is expanding its programs and will start the College of Education on its campus this Fall. Education and teaching is one of the most demanding fields for female students. To encourage more women onto higher education, we offer reduced rates for female students applying. We are now in the process of building a girls hostel on campus to accommodate new enrollment. We encourage you to continue to support this project so we can provide for our female students as soon as possible.

INDO-US PUBLIC SCHOOLS IN SLUMS

In India, it's not uncommon to see a child roaming the streets, working or even begging during school hours. The option to live outside the complex of government services is usually reserved for the rich or middle class, who can afford private resources such as private housing, hospitals and schools. But as India's economy has expanded during the past two decades, an increasing number of India's poor parents are now scraping together money to send their children to low-cost private schools in hopes of helping them escape poverty. They know too well the cycle will only continue unless it's broken through education.

Education is one of India's most pressing challenges. Half of India's 1.2 billion people are 25 or younger, and literacy levels amongst the Muslims has dropped lower than the national average. In many states, government education is in severe disarray, with teachers often failing to show up or not qualified or credentialed to teach. Repetition drilling still predominates the method of learning and English is considered a prerequisite for most white-collar employment in India, is usually not the medium of instruction. According to the Sachar Committee's findings, 25% of Muslim children in the 6-14 age group either never went to school or else dropped out at some stage.

Worldwide history has proven that education is one of the most powerful instruments for reducing poverty and inequality - two factors Muslims and minorities in India face today. It's imperative that we invest and provide quality education to areas where children are suffering the most, in slums. For anyone who has never visited a slum in India, their reference closest to it may be the image portrayed in the 2009 movie *Slumdog Millionaire*. It definitely placed the slums of India on a map and raised awareness on how large of an issue poverty in India is.

IMRC's goal is to provide quality education from elementary to University levels; thus, it has launched the Indo-US Public School in Slums project. Inshallah, our goal is to build and support 100 schools in slum areas across India over the next five years. We have begun with seven schools already, each one costs \$35,000, and inshallah plan to continue with a goal of building twenty per year. Through your support, we can invest in the future of these poverty struck children and help prepare them for success, InshAllah.

5 year goal

Build 100 schools

Build & support schools in slum areas to truly tackle the education system amongst minorities & Muslims.

Your generosity of \$35,000 will build a school.

PROGRAM: EMERGENCY RELIEF

IMRC operates in response with relief and aid to natural disasters as well as the outcome of communal riots. With each case poor children and women are the most vulnerable to falling into poverty and abuse. When disasters or communal riots strike the efforts made to improve health and nutrition status among marginalised communities may be wiped out overnight.

Assam, Kashmir and Andhra Relief

Several decades of work rooted in local communities has earned IMRC trust from the Indian government and civil society to make it a partner with other local NGO's during times of emergency. When the floods in Kashmir, Assam and Andhra hit last year, it left over 6 million victims homeless, displaced without food or water, homes destroyed, and crops and livestock wiped out. It was considered the worst floods in decades leaving thousands dead and 75% of Kashmir submerged.

Within 48 hours of the floods, IMRC sent \$100,000 to be used for food, medicine and relief kits. Our Blanket Drive soon followed with winter right around the corner. With your generous donations and support, we collected over \$47,000 to use for blankets and warm clothes.

The Executive Director visited the victims in November and saw the devastation they went through. He assessed the site and personally spoke with the victims to see how IMRC can further assist them. He found out that many victims wanted their children to continue with their education but couldn't because they lost everything in the flood.

IMRC and its implementation partner ITSP (Invitation Towards Straight Path), one of the many organizations in India who has been on ground since the floods, are developing an incentive scholarship program for the flood victims. This is one of the many long term projects that the IMRC team is doing to help the victims be self-sufficient again. Your support and donations are appreciated as we help provide long term assistance such as self-employment kits to the victims.

PROGRAM: 1000 ORPHAN PROJECT

India has approximately three times the population of the United States living in one third of the space. When you introduce intense poverty, drought, natural disasters, famine and lack of resources for children and families you have a recipe for tragedy and most significantly, vulnerable children. In many cases, these children are forced into labor, are abused and/or work at an early age for their own families, thus not in school.

We found young 11 year old Shehzad, working in a shop in Jharkhand where poverty is rampant. We learned his mother had sent him to work out of desperation. The Rs. 20 (USD \$0.34) he earned after a day's work at the shop was feeding his entire family, perhaps just once a day. At least having a meal once a day was better than starving to death, the mother had thought.

Mashallah, his father was an active in community work and known to be pious. He used to work as a driver to feed his wife and 6 children. Sadly, he passed away after a struggle with cancer.

Shehzad's uncles nor other relatives helped after his father passed away. On the contrary, they snatched his father's land. Shehzad's paternal grandmother drove him, his siblings and their helpless mother out of their home. His family became homeless.

Shehzad has now been taken under IMRC's care for education and support through the 1000 Orphans Project. He is in 3rd grade and his teachers find him to be a bright student who takes a strong interest in studying. He is on his way to become an Alim inshaAllah. He now has proper food, clothing and shelter. Our field workers are also taking care of his widowed mother and siblings with a pension of Rs 2000 (\$34 a month).

Your generosity helped make all of this possible!

30 million

According to the Washington Post (March 2015), there are an approximate 30 million orphans in India. IMRC began with orphan support over 30 years ago and now has revamped its program to focus on providing more than the bare essentials of education and food. We're providing further assistance to truly break the cycle of an orphan in poverty and help him/her set goals and to assist them towards success, Insh'Allah.

119 orphans

These are the number of orphans' lives you changed through the new program in 2014. Your continuous support can ensure these children will have access to a true environment of family, quality education, food and clothing and tools to become successful. Many orphans are prone to trafficking, abuse and other horrible atrocities. Through your support we can change their lives. Help IMRC reach it's goal to support 1000 orphans today! Jazakh Allah khair!

The Prophet Muhammad (S) said, "I will be like this in paradise with the person who takes care of an orphan." The Prophet (S) raised his forefinger and middle finger by way of illustration. {Al-Bukhari}

\$50/month

Supports an orphan with food, clothing, and quality education. It's important to go beyond the minimum and give extra to uplift their situation and eventually break the cycle out of poverty.

PROGRAM: FEEDING IN RAMADAN

Our year round feeding program has provided warm cooked meals and meals in grains since 1981. Our team has worked with local organizations to develop a distribution program which can reach across India. Our most demanding and important time of the year is during Ramadan. It's this month of fasting and spiritual reflection which brings us closer to Allah subhanu wa ta'ala and more tuned to the needs and suffering of others.

Subhan'Allah even the most poverty struck still observe fast though they hardly have anything to eat for suhoor and iftar.

Each year IMRC's [Ramadan Feeding Program](#) provides an average of 2 million meals. Our dedicated team on-site has worked with us for over 30 years to keep our overhead low to ensure every dollar given is spent for its cause.

Alhamdulillah, we have reached hundreds of thousands of people with meals during this blessed month including a new pair of Eid clothes. We were able to provide meals in grains, cooked meals and community iftars at Project REED locations too. As Ramadan nears again, we ask for your support to ensure others may also enjoy iftar, Ramadan, and Eid inshallah.

RAMADAN FEEDING PROGRAM

1.6 million

Meals were distributed in grains to the needy from our 2014 Ramadan program.

\$30,000

Worth of Fitra was distributed in time for Eid.

12,000 families

Benefited from the fitra distribution

\$320,000 sent

Alhamdulillah, with your support \$320K was sent to the needy to provide meals and grains. Jazakh Allah khair!

DON'T WAIT FOR RAMADAN TO ARRIVE, GIVE TODAY!

Send your support early this year to ensure the needy have food in time for Ramadan.

Just \$1

PROVIDES A **WARM COOKED MEAL** OR **FOUR MEALS IN GRAINS**

Just \$10

PER PERSON FOR **FITRA** OR CHILD'S **EID OUTFIT**
\$20 FOR AN ADULT'S **EID OUTFIT**

Just \$50

PROVIDES **GRAINS (GROCERIES)** FOR A FAMILY OF 4 FOR **ALL OF RAMADAN**

Just \$150

SPONSORS AN ENTIRE **VILLAGE'S** IFTAR

PROGRAM: QURBANI

For those who do not go to Hajj, Eid Al-Adha is celebrated locally with their families with special treats and meals. It's also a special time of the year in which many less fortunate families anticipate an IMRC sign in the local village knowing IMRC will deliver a meat package on the day of Eid to them.

Each year, IMRC reaches out to poor villages and communities in rural India to perform Qurbani and distribute its meat. Meat is considered a luxury for these families because many cannot afford it. Thanks to you, we were able to perform 4,662 Qurbanis on time benefiting over 550,000 people. 110,000 families were able to enjoy meat with their meal on Eid across India. Jazak Allahu khair for making our Qurbani program a success!

550,000

People benefited from the 2014 Qurbani program.

4,662 Qurbani

Were performed and distributed to the poor.

\$50/share of animal \$120/goat

IMRC performs and distributes its Qurbani in rural & remote areas where many organizations do not reach out to.

It is imperative for IMRC to run a cost effective program that truly assists the poor. Our rate for Qurbani covers the cost of performing Qurbani and distributing the meat to the poor. We work with local partners and have our sister organization, Sahayata Trust, in India which oversee the operations and logistics.

PROGRAM: PROJECT REED

RURAL EDUCATION & ECONOMIC DEVELOPMENT

Six years ago we first began this project in hope of educating families and communities in rural India about Islam. These locations were specifically chosen due to a survey conducted which showed thousands of Muslims left Islam due lack access to Islamic education and/or influence. Through your support we began to build one site at a time to assist these vulnerable families. The number of families and entire communities that have received the message of Islam and accepted it into their lives is astounding. Each location has a full-time teacher on-site to provide elementary education for children, Quran lessons, daily prayers, halaqa classes for men and women too. Communities now take pride in having a place of worship in which their entire families can benefit from. The most exciting time of the year is during Ramadan where the community looks forward to a sponsored iftar, praying together at tharaweah and having Eid prayer and celebrations.

We have built over 80 locations and more are in progress. We couldn't have done any of this without your support, dedication and understanding. For each person who supported this project, we thank you immensely. You've made a wonderful difference for these communities who also make dua for you as well. Insh'Allah, may it multiply many-folds!

Our goal is to continue to build one new location per month and hope to reach to 100 locations, insh' Allah! To build a new location costs approximately \$25,000.

\$25,000

The cost to build one REED location.
Help us reach our goal of 100 locations!

\$1000/year

The salary of a teacher for each location. Your support is needed to continue to serve these communities.

\$1000/year

For maintenance of each location; a vital part for upkeep. Please send your support!

PROGRAM: VILLAGE WATER WELLS

BUILT 57 BORE WELLS & 75 HAND PUMPS

103.8 million people lack access to clean drinking water in India; posing a sanitation problem. (water.org/India) In April 2013, IMRC initiated a Water Well Project which builds water wells and hand pumps in rural and impoverished communities.

During long summer days, it is extremely difficult for the elderly and older women to walk miles away just to fill one bucket or pot of water for an entire family. It's not only tiring and time consuming, but in such remote areas it can be unsafe to travel such long lengths. Also, if one was to run out of water before the next day, it's near impossible to travel at night to get more. Families have to wait until daylight to begin the journey again. By building a well at a local central location, many families and entire communities can benefit from it.

57 bore wells & 75 hand pumps

Alhamdulillah with your generous donations in 2014, we have been able to build 57 bore wells and 75 hand pumps; that's 132 sources of water since our launch.

Now rural communities can access water without having to travel long distances. Jazak Allahu khair for supporting this project and providing communities the basic essential that once was difficult to get. Many communities where water wells were installed expressed joy and immense gratitude for having local access to potable water.

You can dedicate each water well as sadaqa-jaariya on your behalf or your loved ones, especially those who passed away. We will inform you about the exact location and the results.

97 million

The number of Indians lack access to safe water today, second to China - The World Health Organization.

1600 deaths

Each year caused by diarrhea alone in India.

21 percent

Of communicable diseases in India are related to unsafe water - The World Bank.

"Whosoever digs a well will receive reward for that from Allah on the Day of Judgment when anyone amongst jinn, men and birds drink from it" - Bukhari and Muslim

Build a well for \$1500

It costs \$1,500 on average to build a well that will not only count as sadaqah jaariyah on your behalf, but benefit hundreds of people.

PROGRAM: INDO-US HOSPITAL

With the continued rise of diabetes in India affecting more than 62 million individuals, it's nearly impossible for people living below the national poverty level to afford healthcare. IMRC saw the opportunity to assist in resolving the issue by building the Indo-US hospital.

Thanks to your support and donations, the hospital was built in 18 months composed of 6 stories with 18,000 square feet of space. Since its inauguration in January 2012, more than 25,000 patients have been seen and treated. The facility is composed of an eye center, ER, dialysis center, internal medicine department and pharmacy; all which are low cost and/or free of cost to the poor. Each year, we're expanding our departments and services to cater to the growing community and its needs.

In 2014, the Indo-US Hospital

- Treated over 8,000 patients
- Screened over 19,000 people for eye diseases
- Performed 2,500 dialysis sessions
- Operated 465 cataract surgeries with lens implants
- Performed 64 surgeries (orthopedic, neuro & general)

Total of 25,424 patients have been treated/seen since the hospital's opening, alhamdulillah.

Jazakh Allah khair for making this possible!

It is a blessing to see such services available for those in need of medical attention. Your generosity enables us to continue to provide and assist the sick.

PROGRAM: INDIA HEALTH INITIATIVE

BRINGING FREE HEALTHCARE TO RURAL INDIA

This program started with the concern for those living in rural and slum areas who lacked access to medical treatments. Because of this, many aren't seen by a doctor or feel that they cannot afford the service. Thanks to a group of volunteer physicians and medical professionals from the US who teamed up with local doctors in India, thousands were able to get the treatment and screening they needed. Professionals ranged from physicians, geriatrics to surgeons and registered nurses.

This year, camps were held for three weeks in Hyderabad, Jharkhand, UP and Rajasthan, marking the 5th year for India Health Initiative. Many walked long distances and waited for hours to get checked. For more serious cases or further follow ups, patients were referred to our Indo-US hospital.

May Allah reward the doctors who took time out of their busy schedules to give back to the community. We encourage medical professionals to join us each year. Our next program will be in January 2016. Join us and share it with a friend who may be interested in joining. We look forward in working with you soon!

10 camps

Ten medical camps were conducted across Hyderabad, Lucknow and Rajasthan.

7,000 patients

Patients were treated over the 3 week health initiative.

15 volunteers

Fifteen volunteers of medical background volunteered their time to treat the sick ranging from surgeons, ophthalmologists, ER specialists, OB/GYN to geriatrics.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of IMRC of Mountain View, CA

We have audited the accompanying financial statements of IMRC (a nonprofit organization), which comprise the statement of financial position as of December 31, 2014, and the related statements of activities, functional expenses and cash flows for the year then ended, and the related notes to the financial statements.

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of IMRC as of December 31, 2014, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

ENDOWMENT – A GIFT THAT KEEPS ON GIVING CREATE YOUR SADAQAH JARIYAH TODAY

LEAVE A LEGACY FOR YOURSELF OR LOVED ONES

Your continued support and generosity over the years has been the heart and soul of IMRC. As we celebrate 33 of years of services, we want to say thank you and also ask for your inspiration and ongoing support for the next 10 years and onward and more inshallah.

IMRC currently oversees a number of vital Legacy Projects. A Legacy Project is a large strategic project that can make a meaningful impact on multiple generations. These projects require vision and sustained commitment over time. Some of our Legacy Projects include Jahangirabad Institute of Technology (JIT) University, Challenger International School, Indo-US Hospital, and Project REED, which has completed development of over 80 masjid and school dual-use facilities.

For this and other projects, we need your generous support towards our Endowment. The IMRC Endowment is a form of Sadaqah Jariyah. An Endowment can be a one time donation of stocks, property, portion of your retirement pension or 401k, or a portion of the assets in your Will. The impact of your investment multiplies as your wealth is reinvested yearly and the income supports the poor and needy.

“When a man dies, his deeds come to an end except for three things; Sadaqah Jariyah (ceaseless charity), a knowledge which is beneficial, or a virtuous descendant who prays for him (for the deceased).”

- Sahih Muslim

Book 13 - Hadith 4005

LEGACY PROJECTS

Jahangirabad Institute of Technology - JIT

JIT offers programs in Science, Engineering, Media and Technology & Leadership Training. We believe it is imperative for students to learn the skills, confidence and leadership to not only master their area of emphasis but to be committed to giving back to their communities where they came from. JIT's students primarily come from very poor families and 90% receive financial aid. JIT focuses on providing opportunities for minorities and places special importance on girls. Our goals are to start a College of Education, a College of Liberal Arts, a Girls Junior College and complete a Girls Hostel building.

Challenger International School

This state-of-the-art school is unique with not only its facilities and campus, but its integration of orphan and destitute children with other children at one school. Challenger's objective is to provide quality and purposeful education using innovative methods through the expertise and experience of a highly qualified staff. The encouraging environment and teaching method encourages the children to enjoy their studies and develop a life long love of education.

Indo-US Hospital

This hospital specializes in offering healthcare for treating diabetes and its related illnesses at an affordable low cost or free of cost for patients that cannot afford treatment. Each year the hospital has been expanding its services and currently offers a Dialysis Center, Eye Center, Emergency Room, Internal Medicine and a Pharmacy. In 2014 alone, over 26,000 patients were provided quality, affordable treatment.

Project REED (Rural Education & Economic Development)

Project REED was launched in 2009 with the goal of bringing religious education and a sense of community and belonging to villages that had lost their Islamic identity due to lack of services. Many Muslim families in these villages had lost the basic tenants of Islam and could not even recite the Shahada. Alhamdulillah, today we have over 80 locations in which a masjid and school dual-use facility has been established and offers services to men, women and children. These community centers provide regular prayer services, elementary education, Quran and halaqa classes, dars programs and Ramadan iftars and community activities. Our goal is to continue to build a masjid and school facility and offer services to a new village each month.

LOOKING AHEAD

MILESTONE TO ACCOMPLISH IN 5 YEARS DEDICATE IN THE NAME OF YOUR CHOICE

COLLEGE OF EDUCATION

\$1 MILLION EACH

Build four new College of Education facilities in different cities that offer a Bachelors of Education and a Diploma of Education for future teachers.

HOSTEL FACILITIES

\$600,000 EACH

Build a girls hostel and a separate boys hostel at JIT. Build a girls hostel at Challenger International School. Each hostel has a library and kitchen area.

MEDIA INSTITUTE AT JIT

\$100,000

Expand the existing Media Institute to offer a full Bachelors Degree program in Media.

Indo-US Hospital

\$100,000

Expand existing hospital facilities to start an Intensive Care Unit.

PROJECT REED

\$25,000 EACH

Build 80 new masjid and school dual-use facilities in rural areas and villages across India.

INDO-US PUBLIC SCHOOLS FOR SLUM CHILDREN

\$40,000 EACH

Build 100 quality new schools for elementary through secondary education in slum areas across India. Each school can accommodate 300 - 1,000 students.

EMPLOYMENT DEVELOPMENT

\$10,000

Expand existing programs to provide vocational training for communities to gain skills needed to become self-sufficient.

FEEDING PROGRAM

\$6,000

Expand current Ramadan Feeding program from 2 million meals in grains to reach 4 million meals.

WATER WELL PROJECT

\$1,500 EACH

Build 200 new Water Wells in rural areas and villages across India.

WHAT YOUR ENDOWMENT CAN SUPPORT

SCHOLARSHIP FUND

For every \$12,500 invested with the Scholarship Fund we expect to generate \$1,000 in income on an annual basis. This is sufficient to provide one University Scholarship and support a very deserving student's tuition for one year in your name. You can give \$50,000 for four scholarships.

FEEDING PROGRAM

A one-time donation of \$6,000 invested towards the Feeding Program can feed 500 people every Ramadan annually.

WATER WELL PROGRAM

For \$20,000 towards the Water Well program you enable one water well to be built each year.

LOW OVERHEAD
DELIVERS YOUR FUNDS TO THE CAUSE

IMRC works with a dedicated team, visionary leaders and over 100 organizations in India to improve social structures and economic opportunities so minorities & Muslims in India can have the opportunity to reach their full potential, contribute to society, have a voice in decisions that affect them, and live and work with dignity.

WAYS TO SUPPORT

GROW YOUR WEALTH AND PROVIDE SADAQA JARIYA AT THE SAME TIME.

GIVE STOCK THROUGH AN INVESTMENT ACCOUNT/IRA

If you have appreciated stock in your portfolio you should consider gifting that stock to receive a charitable deduction and avoid paying capital gains taxes. You can also consider gifting your mandatory IRA as another option for tax deductible support.

One of the simplest ways to make a significant donation is to name IMRC as the beneficiary of your IRA. By doing this, you avoid the double taxation that an IRA is charged with upon the passing of the owner. You receive the benefits of the funds for your entire life, while enabling you to support IMRC for years after your passing rather than sending your hard-earned dollars to the IRS.

Likewise, creating various trust structures can help you avoid estate taxes, while simultaneously helping IMRC fund its charitable projects in India for years to come.

MATCHING GIFT

Many employers encourage their employees to contribute to qualifying charitable organizations and will match the contributions their employees make. Several of our programs reach out to communities in need and do not deny anyone regardless of faith, gender, or caste. For a certified letter for your employer, please contact our office.

IN YOUR WILL

By including IMRC in your will you help IMRC continue efforts to open doors of opportunity for future generations of India's poor and needy. By naming IMRC in your Will with a specific dollar amount or percentage of your assets you can take control of the legacy you leave behind. Our efforts are due to generous donors with vision like you. Your continuous support is needed.
