

WATER WELL

PROGRESS REPORT

OCT 2024- DEC 2024

EXECUTIVE SUMMARY

Water projects underway across these states:

This report provides an interim update on the ongoing water well projects in six states: Madhya Pradesh, Rajasthan, Uttarakhand, Jharkhand, Telangana and Bihar. The goal is to ensure access to clean drinking water for underprivileged communities through the construction of water wells and small hand pumps.

KEY UPDATES INCLUDE:

- In Madhya Pradesh, 11 wells have been completed. Final touches like name plaques left to be installed. 1 under construction.
- In Rajasthan, 25 wells have been completed & next batch of wells are under construction.
- In Uttarakhand, 21 wells almost completed. Finishing touches, painting etc remain.
- In Bihar, 12 small handpumps have been built. Next batch of handpumps as part of 2025 water project is under construction.
- In Jharkhand, 15 handpumps and 1 borewell built.
- 1 borewell built in Telangana.

The following sections will provide state-wise breakdowns and details of each project.

MADHYAPRADESH

As part of our ongoing water well project, the submittable reports for 12 wells in Madhya Pradesh have been submitted. To date, 11 wells have been successfully completed, all located within Agar District. Remaining 1 well is under construction.

Location: Near Darul Ulu Madrasa
District: Agar, M.P.

Location: Near Quba International School, District: Agar, M.P.

Ramsar, Barmer, Rajasthan

Location: Alam ki Dhani, Gadra, Barmer, Rajasthan

Location: Ali ki basti, Ramsar, Barmer, Rajasthan

Location: Dedokri, Gadra, Barmer, Rajasthan

Location: Haaji Rasool ka pada, Ramsar, Barmer, Rajasthan

Location: Majeed ki Dhani, Ramsar, Barmer, Rajasthan

Location: Maruf ki dhani, Ramsar, Barmer, Rajasthan

UTTARAKHAND

In Uttarakhand, all 21 planned wells built. Finishing touches, painting etc remain. Delay due to bad weather.

- Location: Mohnawala, Khanpur, Haridwar, UK
- Status: Completed (awaiting name plate/plaque)
- Borewell Depth: 210 feet
- Population Served: 2,025

- Location: Aasafnagar, Kalyar Sharif, Haridwar, UK
- Status: Completed (awaiting name plate/plaque)
- Borewell Depth: 230 feet
- Population Served: Approximately 1,500-1,600

TOTAL WELLS PLANNED

21

COMPLETED WELLS

21

CONSTRUCTION IN PROGRESS

Finishing touches remain

- Location: Bandarjod, Buggawala, Haridwar, UK
- Status: In Progress
- Borewell Depth: 200 feet dug (10-20 feet more to be dug)
- Population Served: 5,000-5,500

JHARKHAND

All 15 planned handpumps and 1 borewell have been completed here.

1 borewell

BIHAR HANDPUMPS PROJECT

- Location: Bela Situhar Village
- Population: 1800 adults + children (300 homes)

CURRENT PROGRESS

- **Total Hand Pumps Planned: 12**
- **Status: All 12 handpumps constructed.**

In the same region affected by the devastating floods, Bela Setuhar, we identified a pressing need for clean water. Along with providing food, shelter, and other emergency relief, our team has begun working on small hand pumps to ensure access to safe drinking water.

While large bore wells aren't necessary due to the availability of groundwater close to the surface, small hand pumps are a practical and cost-effective solution for this village. Our goal is to install at least 20 hand pumps (although there's need for more in ADJACENT VILLAGES), each serving several households. 12 handpumps have been made in 2024. 8 are under construction (as per our 2025 plan).

Since 1 handpump suffices about 100 people, these 20 handpumps would be sufficient for the entire population of Bela Situhar. We hope to expand our efforts and install more hand pumps if/as additional funds become available for neighboring villages. At least 30 more handpumps needed for the neighbouring communities. These small but essential steps will provide long-term clean water access for the residents of Bela Situhar & adjacent villages, helping them rebuild their lives after the flood.

NEXT STEPS & CONCLUSION

2025 PLAN (1ST QUARTER)

Bihar-
8 handpumps

WESTBENGAL-
10 wells

RAJASTHAN-
15 wells

This year, we're expanding our water relief to more areas of Rajasthan, Bihar & West bengal. We will keep you updated on the progress and any future developments. Thank you for your ongoing support and dedication to this cause. Together, we are making a tangible impact in the lives of countless individuals.
